| Hi Melissa,  |
| Thanks for sending this over. Unfortunately, I've had a few last-second things stack up on my end. Does Mr. Hoyt have any availability next week? And does Mr. Schneider? My apologies for the sudden shift here. Looking forward to making this happen very soon. |
| Best,  |
| David  |

| Hi Melissa,   |
| Thanks for following up. Wednesday is a little tricky, but I should be pretty open all of tomorrow. Let me know when works best and I'll make sure I'm available.                                   |
| Best,   |

| Story deadline: 11/29  | Hi Shayla,   |
|  |  |
| Sample questions:  | Story deadline: 11/29  |
|  | Sample questions:  |

- What first drew your attention to ITC/lead to the facility's inspection in 2012? Essentially, what compelled Region 6 to visit the facility that fall?
- Had you been out to ITC before? Or was it your first time there?
- The inspection report is very detailed, but I'm hoping to better understand what your experience on the ground was like. What was your process like during the inspection? What kind of tools did you use (FLIR cameras, etc.)? I'm hoping to, from a narrative perspective, understand what it's like to be a part of one of those inspections.
- The inspection notes potentially high emissions from a number of tanks. Can you contextualize these findings in any way for me? I'm just hoping to better understand the scale/severity of these emissions (since there are so many factors that go into measuring them), what you + your team were seeing, etc.
- Your team also saw high emission levels at Vopak, correct? How did those compare with those found at ITC, in terms of scale, scope, and frequency?
- Who was your team's main contact at ITC at the time?
- Looking back, what stood out to you most about the facility and inspection? Any takeaways that stick out in your mind?

Please let me know if you need any clarification on these, Shayla, or if there are specific inquiries you have concerns about. I'm happy to flesh them out or simplify them.

Thanks again,
David

**Subject:** Interview request — Mr. Daniel Hoyt

## Good morning,

My name is David Leffler and I'm a reporter with <u>Public Health Watch</u>, a nonprofit, nonpartisan news organization focused on threats to America's well-being.

I'm currently working on a story looking back at the 2019 fire at the Intercontinental Terminal Company's (ITC) facility in Deer Park, Texas. Specifically, I'm hoping to better understand the facility's culture and history, including past violations and similar aspects of EPA and TCEQ oversight.

During my research, I came across Mr. Daniel Hoyt's inspection of the facility in the fall of 2012. (Mr. Hoyt is currently an environmental engineer at EPA headquarters in the Office of Enforcement and Compliance Assurance.) His inspection itself has been very helpful for the story, but I have a few follow-up questions that I'd like to, if at all possible, run by Mr. Hoyt. Just hoping to learn more about his experience during the inspection and what stood out to him most at the time.

Thanks in advance for your time and consideration here. Feel free to let me know if you have any questions or concerns that I can help address, or if you'd like more information about this project.

Best regards, David Leffler 512-947-6436
